
A Practical Ndebele Dictionary - 1971

Practical Lexicography: Bn Svensson 1993 This is the first book to give a full and readable account of how dictionaries are made. It is both a general introduction to lexicography and a systematic guide to lexicographic methods. Included are sections on the treatment of pronunciation, inflection, constructions, collocations, and idioms; the principles for the selection and arrangement of a dictionary; and the planning, execution, and monitoring of a dictionary project. Practical Lexicography demonstrates how both one-language and two-language dictionaries are written, the ways in which materials are selected, arranged, and explained, and how computers have revolutionized the making of dictionaries.

Indigenous Knowledge and Learning in Asia/Pacific and Africa D. Kaporo 2010-09-27 This collection makes a unique contribution towards the amplification of indigenous knowledge and learning by adopting an inter/trans-disciplinary approach to the subject that considers a variety of spaces of engagement around knowledge in Asia and Africa.

Language, Vernacular Discourse and Nationalisms-Fine Nhloli 2018-03-15 This book examines the linguistic and discursive elements of social and political power and national political leader statements to read a comprehensive overview of political geography, national sovereignty, immigration, economic imperialism, land reform and black economic empowerment. It adds a fresh angle to the debate on language, culture and nation-building and contributes to the development of knowledge in the field of language and sociality, social and political history, multilingual government, and educational policies. In doing so, they present significant original research, ensuring a comprehensive, wide ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to students of education in Zimbabwe specifically but also widely to all who are interested in how the sociopolitical shapes education - ideology, policy, inter-textual pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country's education.

Cambridge International A Level Information Technology Student's Book Graham Brown 2021-01-20 We are working with Cambridge Assessment International Education to gain endorsement for this title. Developing theoretical and practical IT skills with this comprehensive Student’s Book written by experienced authors and examiners specially for the updated Cambridge International Education & Information Technology syllabus (9626). Improve understanding of concepts and terminology with clear explanations, labelled illustrations, photographs, diagrams, plus a glossary of key terms - Develop theoretical and practical skills with a range of exercises (multi-choice through to discussion type questions), exam-style questions, step-by-step instructions and example answers that all ensure skills are developed alongside knowledge - Follow a structured route through the course with in-depth coverage of the full syllabus Also available in the series: Cambridge International AS Level Information Technology Thiong’o, this is essential reading for anyone with an interest in the linguistic implications of colonization.

Practical Lexicography Thierry Fontenelle 2008-01-24 This reader collects some of the best and most useful work in practical lexicography, focusing on the central issues and hottest topics in the field. An essential resource for all students and scholars of lexicography and lexicology as well as professional lexicographers.

An Introduction to Corpus Linguistics Graeme Kennedy 2014-09-19 The use of large, computerized bodies of text for linguistic analysis and description has emerged in recent years as one of the most significant and rapidly-developing fields of activity in the study of language. This book provides a comprehensive introduction and guide to Corpus Linguistics. All aspects of the field are explored, from the various types of electronic corpora that are available to instructions on how to design and compile a corpus. Graeme Kennedy surveys the development of corpora for use in linguistic research, looking back to the pre-electronic age as well as to the massive growth of computer corpora in the electronic age.

Cambridge World History of Lexicography John Consilience 2019-08-22 A dictionary records a language and a cultural world. This global history of lexicography is the first survey of all the dictionaries which humans have made, from the ancient civilizations of Mesopotamia, Egypt, China, India, and the Greco-Roman world, to the contemporary speech communities of every inhabited continent. Their makers included poets and soldiers, saints and courtiers, a scribe in an ancient Egyptian ‘house of life’ and a Vietnamese queen. Their physical forms include Tamil palm-leaf manuscripts and the dictionary apps which are supporting endangered Australian languages. Through engaging and accessible stories, a diverse team of leading scholars provide fascinating insight into the dictionaries of hundreds of languages, into the imaginative worlds of those who used or observed them, and into a dazzling variety of the literate cultures of humankind.

Black Linguistics Arinta Ball 2005-08-19 Enslavement, forced migration, war and colonization have led to the global dispersal of Black communities and to the fragmentation of common experiences. The majority of Black language researchers explore the social and linguistic phenomena of individual Black communities, without looking at Black experiences outside a given community. This groundbreaking collection re-orders the elitist and colonial elements of language studies by drawing together the multiple perspectives of Black language researchers. In doing so, the book recognizes and formalises the existence of a ‘Black Linguistic Perspective’ that highlights the contributions of Black language researchers in the field. Written exclusively by Black scholars on behalf of, and in collaboration with local communities, the book looks at the commonalities and differences among Black speech communities in Africa and the Diaspora. Topics include: - the Oj Simpson trial - language issues in Southern Africa and Francophone West Africa - the language of Hip Hop - the language of the Rastafaria in Jamaica With a foreword by Ngugi wa Thiong’o, this is essential reading for anyone with an interest in the linguistic implications of colonization.

The Languages of Mosambiquense Hilbert H. I. Blok 1856

Suffering for Territory Donald S. Moore 2005-08-22 Since 2001, black squatters have forcibly occupied white farms across Zimbabwe, reigniting questions of racialized dispossession, land rights, and legacies of liberation. Donald S. Moore probes these contentious politics by analyzing fierce disputes over territory, sovereignty, and jurisdiction in the country’s eastern highlands. He focuses on poor farmers in Kaerezi who endured colonial evictions from their ancestral land and lived as refugees in Mozambique during Zimbabwe’s guerrilla war. After independence in 1980, Kaerezians returned home to a changed landscape. Postcolonial bureaucrats had converted their land from a white enclaves into a state resettlement scheme. Those who defied this new spatial order were threatened with eviction. Moore shows how Kaerezians’ predicaments of place pivot on memories of ‘suffering for territory,’ at once an idiom of identity and entitlement. Combining fine-grained ethnography with innovative theoretical insights, this book illuminates the complex interconnections between local practices of power and the wider forces of colonial rule, nationalist politics, and global discourses of development. Moore makes a significant contribution to postcolonial theory with his conceptualization of ‘entangled landscapes’ by articulating racialized rule, situated sovereignties, and environmental resources. Fusing Gramscian cultural politics and Foucault’s analytic of governmentality, he enlists ethnography to foreground the spatiality of power. Suffering for Territory demonstrates how entrenched micro-practices matter, how the outcomes of cultural struggles are contingent on the diverse ways land comes to be inhabited, labored upon, and suffered for.
