White Coat, Black Hat-Carl Elliott 2010-10-13 Over the last twenty-five years, medicine and consumerism have been on an unchecked collision course, but, until now, the fallout from their impact has yet to be fully uncovered. A writer for *The New Yorker* and *The Atlantic Monthly*, Carl Elliott ventures into the uncharted dark side of medicine, shining a light on

the series of social and legislative changes that have sacrificed old-style doctoring to the values of consumer capitalism. Along the way, he introduces us to the often shifty characters who work the production line in Big Pharma: from the professional guinea pigs who test-pilot new drugs and the ghostwriters who pen "scientific" articles for drug manufacturers to the PR specialists who manufacture "news" bulletins. We meet the drug reps who will do practically anything to make quota in an ever-expanding arms race of pharmaceutical gift-giving; the "thought leaders" who travel the world to enlighten the medical community about the wonders of the latest release; even, finally, the ethicists who oversee all that commercialized medicine has to offer from their pharma-funded perches. Taking the pulse of the medical community today, Elliott discovers the culture of deception that has become so institutionalized many people do not even see it as a problem. Head-turning stories and a rogue's gallery of colorful characters become his springboard for exploring larger ethical issues surrounding money. Are there certain things that should not be bought and sold? In what ways do the ethics of business clash with the ethics of medical care? And what is wrong with medical consumerism anyway? Elliott asks all these questions and more as he examines the underbelly of medicine.

Hats-Clair Hughes 2017-06-01 Although a hat may be designed for the purpose of practicality or aesthetics, it is part of a complex interplay of wider cultural meanings. Throughout history hats have played a significant role in expressing and revealing notions of class, gender, authority, fashion and etiquette. By examining the consumption and production of hats from the 18th century to the present day, this book explores their significance as markers of social and cultural change. Taking a thematic approach, Clair Hughes charts how headgear during the modern era has been shaped by status, gender and necessity. Using case studies such as the bowler hat, which has moved up and down classes and professions, Hughes reveals that although a hat might seem bound to its status and context, it is as susceptible to subversion and reinvention as the society which creates it. From the transition of pilots' helmets from practical headgear to fashion items, to the Slouch hat and the baseball cap, hats have responded to cultural or political movements, often becoming conscious displays of identity and social allegiance. Drawing from material and historical research as well as depictions in art, literature and film, Hughes provides a fascinating insight into hats as a visible performance of social values and

Feline Philosophy-John Gray 2020-11-24 The author of *Straw Dogs*, famous for his provocative critiques of scientific hubris and the delusions of progress and humanism, turns his attention to cats—and what they reveal about humans' torturous relationship to the world and to themselves. The history of philosophy has been a predictably tragic or comical succession of palliatives for human disquiet. Thinkers from Spinoza to Berdyaev have pursued the perennial questions of how to be happy, how to be good, how to be loved, and how to live in a world of change and loss. But perhaps we can learn more from cats--the animal that has most captured our imagination--

than from the great thinkers of the world. In *Feline Philosophy*, the philosopher John Gray discovers in cats a way of living that is unburdened by anxiety and self-consciousness, showing how they embody answers to the big questions of love and attachment, mortality, morality, and the Self: Montaigne's house cat, whose un-examined life may have been the one worth living; Meo, the Vietnam War survivor with an unshakable capacity for "fearless joy"; and Colette's Saha, the feline heroine of her subversive short story "The Cat", a parable about the pitfalls of human jealousy. Exploring the nature of cats, and what we can learn from it, Gray offers a profound, thought-provoking meditation on the follies of human exceptionalism and our fundamentally vulnerable and lonely condition. He charts a path toward a life without illusions and delusions, revealing how we can endure both crisis and transformation, and adapt to a changed scene, as cats have always done.

Hats Are Not for Cats!-Jacqueline K. Rayner 2019-08-20 Are hats for cats?

A big, bossy dog and a determined cat disagree. This funny rhyming romp—with a large cast of cats and hats—leads readers to the perfect conclusion: hats are for everyone! A big, severe, plaid-hat-wearing dog insists that the small black cat in the red fez shouldn't be wearing a hat—any kind of hat—because hats are for dogs. His patronizing tirade doesn't convince this cat, however. Defiantly, she wears an assortment of hats, described in the gleeful rhyming text, and brings in other cats to join the protest. The silliness of both text and pictures offers a cheerful take on

bossiness and managing conflict, with a win-win resolution.
