Kama Muta-Alan Page Fiske 2019-12-20 This book describes a ubiquitous and potent emotion that has only rarely and recently been studied in any systematic manner. The words that come closest to denoting it in English are being moved or touched, having a heart-warming feeling,
feeling nostalgic, feeling patriotic, or pride in family or team. In religious contexts when the emotion is intense, it may be labeled ecstasy, mystical rapture, burning in the bosom, or being touched by the Spirit. All of these are instances of what scientists now call ‘kama muta’ (Sanskrit, ‘moved by love’). Alan Page Fiske shows that what evokes this emotion is the sudden creation, intensification, renewal, repair, or recall of a communal sharing relationship – when love ignites, or people feel newly connected. He explains the social, psychological, cultural, and likely evolutionary processes involved – and how they interlock. Kama muta is described as it manifests in diverse settings at many points in history across scores of cultures, in everyday experiences as well as the peak moments of life. The chapters illuminate the occurrence of kama muta in a range of contexts, including religion, oratory, literature, sport, social media, and nature. The book will be of interest to students and scholars from a number of disciplines who are interested in emotion or social relationships. Untimely Bollywood-Amit S. Rai 2009-05-06 Known for its elaborate spectacle of music, dance, costumes, and fantastical story lines, Bollywood cinema is a genre that foregrounds narrative rupture, indeterminacy, and bodily sensation. In Untimely Bollywood, Amit S. Rai argues that the fast-paced, multivalent qualities of contemporary Bollywood cinema are emblematic of the changing conditions of media consumption in a globalizing India. Through analyses of contemporary media practices, Rai shifts the emphasis from a representational and linear understanding of the effects of audiovisual media to the multiple, contradictory, and evolving aspects of media events. He uses the Deleuzian concept of assemblage as a model for understanding the complex clustering of technological, historical, and physical processes that give rise to contemporary media practices. Exploring the ramifications of globalized media, he sheds light on how cinema and other popular media organize bodies, populations, and spaces in order to manage the risky excesses of power and sensation and to reinforce a liberalized postcolonial economy. Rai recounts his experience of attending the first showing of a Bollywood film in a single-screen theater in Bhopal: the sensory experience of the exhibition space, the sound system, the visual style of the film, the crush of the crowd. From that event, he elicits an understanding of cinema as a historically contingent experience of pleasure, a place where the boundaries of identity and social spaces are dissolved and redrawn. He considers media as a form of contagion, endlessly mutating and spreading, connecting human bodies, organizational structures, and energies, thus creating an inextricable bond between affect and capital. Expanding on the notion of media contagion, Rai traces the emerging correlation between the postcolonial media assemblage and capitalist practices, such as viral marketing and the development of multiplexes and malls in India.

Chasing Walls-Ana Filomena Amaral 2019-02-15 There are walls that oppress in the name of peace, brutal walls that exist at the threshold of genocide. In this stunning novel, Albert is a journalist who makes his way from Berlin to Korea to Northern Ireland, from Western Sahara to Palestine, from Kashmir to Mexico and Brazil. His long odyssey reveals the theaters of war, torture, and inhumanity that still exist in the world, caused by walls. This story is an alert to these realities that are hidden behind ignorance, apathy, and indifference. Humanity is in a backward way. Today’s issue of Syrian
refugees has wakened the medieval and dark fears that are inconsistent with the defense of the most basic rights of all human beings. What do we do, but build walls to defend ourselves, as if they are the solution for all problems, yet those that still exist prove otherwise. When we accept that we were once all refugees and others welcomed us, this should be the path we must follow to conquer the humanist’s values and evolve towards our humanization. Otherwise, we will fall again into barbarity. The noblest role of literature is its potential to change the world of what in it is wrong, breaking prejudices and barriers of ignorance and indifference. This book meets that noble mission. Albert wants to raise awareness, force us to reflect on our responsibility as human beings towards others who live in oppressive situations.

The Politics of Self-Expression-Markus Daechsel 2006-09-27 The 1930s to 1950s witnessed the rise and dominance of a political culture across much of North India which combined unprecedented levels of mobilization and organization with an effective depoliticization of politics. On the one hand obsessed with world events, people also came to understand politics as a question of personal morality and achievement. In other words, politics was about expressing the self in new ways and about finding and securing an imaginary home in a fast-moving and often terrifying universe. The scope and arguments of this book make an innovative contribution to the historiography of modern South Asia, by focusing on the middle-class milieu which was the epicentre of this new political culture.

Deep Listeners-Judith Becker 2004 Judith Becker brings together scientific & cultural approaches to the study of music & emotion, & music and trancing. She argues that those who experience deep emotions when listening to music are akin to those who trance within the context of religious rituals.

**The Visceral Logics of Decolonization**- Neetu Khanna 2020-02-28
In The Visceral Logics of Decolonization Neetu Khanna rethinks the project of decolonization by exploring a knotted set of relations between embodied experience and political feeling that she conceptualizes as the visceral. Khanna focuses on the work of the Progressive Writers' Association (PWA)—a Marxist anticolonial literary group active in India between the 1930s and 1950s—to show how anticolonial literature is a staging ground for exploring racialized emotion and revolutionary feeling. Among others, Khanna examines novels by Mulk Raj Anand, Ahmed Ali, and Khwaja Ahmad Abbas, as well as the feminist writing of Rashid Jahan and Ismat Chughtai, who each center the somatic life of the body as a fundamental site of colonial subjugation. In this way, decolonial action comes not solely from mental transformation, but from a reconstitution of the sensorial nodes of the body. The visceral, Khanna contends, therefore becomes a critical dimension of Marxist theories of revolutionary consciousness. In tracing the contours of the visceral’s role in decolonial literature and politics, Khanna bridges affect and postcolonial theory in new and provocative ways.

**Wittgenstein and the Practice of Philosophy**- Michael Hymers 2009-12-31
Wittgenstein and the Practice of Philosophy introduces Wittgenstein’s philosophy to senior undergraduates and graduate students. Its pedagogical premise is that the best way to understand Wittgenstein’s thought is to take seriously his methodological remarks. Its interpretive premise is that those methodological remarks are the natural result of Wittgenstein’s rejection of his early view of the ground of value, including semantic value or meaning, as something that must lie “outside the world.” This metaphysical view of meaning is replaced in his transitional writings with a kind of conventionalism, according to which meaning is made possible by the existence of grammatical conventions that are implicit in our linguistic practices. The implicit nature of these conventions makes us vulnerable to a special kind of confusion that results from lacking a clear view of the norms that underlie our linguistic practices. This special confusion is characteristic of philosophical problems, and the task of philosophy is the therapeutic one of alleviating confusion by helping us to see our grammatical norms clearly. This development of this therapeutic view of philosophy is traced from Wittgenstein’s early Tractatus Logico-Philosophicus through his transitional writings and lectures to his great masterwork, Philosophical Investigations, and his final reflections on knowledge and scepticism in On Certainty. Wittgenstein’s discussions of naming, family resemblances, rule-following and private language in Philosophical Investigations are all examined as instances of this sort of method, as is his discussion of knowledge in On Certainty. The book concludes by considering some objections to the viability of Wittgenstein’s method and speculating on how it might be extended to a discussion of moral value to which Wittgenstein never explicitly returns.

**Sounding Islam**- Patrick Eisenlohr 2018-06-08
A free ebook version of this title is available through Luminos, University of California Press’s Open Access publishing program. Visit www.luminosoa.org to learn more. Sounding Islam provides a provocative account of the sonic dimensions of religion, combining perspectives from the anthropology of media and sound studies, as well as drawing on neo-phenomenological approaches to atmospheres. Using long-term ethnographic research on devotional Islam in Mauritius, Patrick Eisenlohr explores how the voice, as a site of divine manifestation, becomes refracted in media practices that have become integral parts of religious traditions. At the core of Eisenlohr’s concern is the interplay of voice, media, affect, and listeners’ religious experiences. Sounding Islam sheds new light on a key dimension of religion, the sonic incitement of sensations that
are often difficult to translate into language.

Thinking with the Familiar in Contemporary Literature and Culture 'Out of the Ordinary' - 2019-09-24

Anglo-Saxon Psychologies in the Vernacular and Latin Traditions - Leslie Lockett 2017-05-08

Old English verse and prose depict the human mind as a corporeal entity located in the chest cavity, susceptible to spatial and thermal changes corresponding to the psychological states: it was thought that emotions such as rage, grief, and yearning could cause the contents of the chest to grow warm, boil, or be constricted by pressure. While readers usually assume the metaphorical nature of such literary images, Leslie Lockett, in Anglo-Saxon Psychologies in the Vernacular and Latin Traditions, argues that these depictions are literal representations of Anglo-Saxon folk psychology. Lockett analyses both well-studied and little-known texts, including Insular Latin grammars, The Ruin, the Old English Soliloquies, The Rhyming Poem, and the writings of Patrick, Bishop of Dublin. She demonstrates that the Platonist-Christian theory of the incorporeal mind was known to very few Anglo-Saxons throughout most of the period, while the concept of mind-in-the-heart remained widespread. Anglo-Saxon Psychologies in the Vernacular and Latin Traditions examines the interactions of rival - and incompatible - concepts of the mind in a highly original way.
